CORE COMPETENCIES

	Languages:	Ruby, Python, JavaScript, Elixir, Erlang/OTP, Java
	Frameworks & Frontend:	Ruby on Rails, React, Phoenix, Vue, jQuery, Bootstrap
	AI & Agentic Engineering:	AI-Native Development, AI-First Development, Multi-Agent Systems, GitHub Copilot, OpenAI Codex, Claude Code
	Architecture:	Modular Monoliths, Packwerk, Microservices, REST, GraphQL, Clean Architecture, DDD, Event-Driven Architecture, Kafka
	Backend & Async Processing:	Sidekiq, Redis, Background Jobs, API Integration
	Databases:	PostgreSQL, MySQL, Oracle/PLSQL, MongoDB, Neo4j, Sybase
	Testing & Quality:	RSpec, Minitest, PyTest, JUnit, ExUnit, SimpleCov, RubyCritic
	Security:	Brakeman, bundler-audit, bundler-leak
	DevOps & CI/CD:	Git, GitHub, GitHub Actions, GitLab, Bitbucket, Docker, Kubernetes, Puppet
	Cloud & Platforms:	AWS, Heroku, Engine Yard, OpenStack, StarlingX, IBM Cloud
	Observability & Tools:	Datadog, Kibana, Redash, Rollbar, OpenAPI/Swagger, Postman
	Telecom & OSS/BSS:	Ericsson OSS-RC, BSS, MSS, APG, AXE, CPP, MOshell
	Engineering Practices:	Clean Code, SOLID, DRY, Design Patterns, Scrum

PROFESSIONAL SUMMARY

AI-Native Software Engineer with a strong Telecom background and more than **7 years** of experience with **Ruby on Rails**. Proficient in **Ruby, React, JavaScript, Python** and **Elixir**, building solutions with agentic systems, modular monoliths, microservices, scalable backend architectures, CI/CD and automation. Deep experience in OSS/BSS and integration of systems in multinational environments. Domain expertise in **billing, payroll, subscription workflows**, and **API integrations**, along with mentoring, technical leadership, and delivering reliable software at scale.

VALUE HIGHLIGHTS

- 7+ years** of experience with **Ruby on Rails** and strong backend focus
- International** experience across LATAM, USA, Canada, and Europe
- 300%** productivity improvement with MOP automation at Ericsson
- Experience with **Rails, React, GraphQL, Redis, Sidekiq, Kafka**, and integrations
- Work with **AI-assisted development, multi-agent systems**, and software modernization

“ Being smart won’t mean a thing if you don’t make the **WORLD** a better place. ”

PROFESSIONAL EXPERIENCE

- 1

06/2013 — Present

Zoatworks — São José dos Campos, Brazil

Founder & Consultant | AI-Native Software Engineer (Contract)

Summary: Providing software engineering and technology consulting focused on AI-native development, Ruby on Rails, systems integration, telecom, and backend platforms.

Key achievements:

 - Built multi-agent AI-first frameworks for eBooks, career workflows, technical blogs, and automation
 - Built an event-driven Ruby on Rails microservice with Kafka to orchestrate student subscription workflows and external API integrations
 - Integrated AI-driven workflows into GitHub-based engineering processes
 - Used AI and code-quality tooling to automate Rails technical-debt analysis and modernization prioritization
 - Developed scalable backend services with Ruby, Elixir, and Erlang/OTP

Projects: AI-First Frameworks, Anubis/CX (Qeevo), PicPay (IEBT), Track Server (ITER), Adalive (Lab360), Taxweb Auditor (GSW), OSS Support (Entel)
- 2

06/2021 — 09/2024

Encora — Campinas, Brazil

Senior Ruby on Rails Engineer | Systems Specialist

Summary: Worked on payroll, billing, and Employer Risk systems at Justworks, plus cloud/edge initiatives at Wind River.

Key achievements:

 - Developed scalable payroll and billing workflows using Ruby on Rails, React, GraphQL, Redis, and Sidekiq
 - Worked on Workers' Comp billing including rates, policies, eligibility, error handling, fallback, and reconciliation
 - Built reliable asynchronous processing with Sidekiq/Redis, including batch S3 workflows
 - Maintained a Packwerk modular monolith and modernized legacy interfaces with React
 - Used CI/CD and observability with GitHub Actions, Datadog, Kibana, Redash, and Rollbar
 - Technical leadership, interviewing, and mentoring

Projects: PEO / Payroll Platform, Time Tracker, WRCP (Wind River)
- 3

07/2018 — 06/2021

InMov — São Paulo, Brazil

Senior Ruby on Rails Engineer (Fullstack)

Key achievements:

 - Developed Smart City applications using Ruby on Rails, JavaScript, jQuery, and AJAX
 - Led Ruby on Rails upgrades from version 4.2 to 6.0, improving performance, security, and maintainability
 - Created Site Rails Manager, a Bash/Docker CLI toolkit to standardize environments and development workflows

Projects: City Hall Permit System, Site Rails Manager
- 4

12/2004 — 06/2013

Ericsson — Indaiatuba, SP, Brazil

Software Developer | Solution Integrator | Project Manager

Key achievements:

 - Developed, integrated, and deployed telecom systems in large-scale OSS/BSS environments
 - Led international initiatives across LATAM, USA, Canada, and Europe
 - Built MOP Automation with Ruby and Rake, achieving 300% productivity improvement
 - Delivered technical training and knowledge transfer in international projects

Projects: BSS Dual Stack / Full IP Rehomeing, MOP Automation, Revenue Assurance (Vivo), OSS/BSS Upgrades & Support

- EDUCATION

 - 1998 — Data Communications — USP
 - 1994 — Software Engineering (Postgraduate) — UNIVAP
 - 1985 — Telecommunications/Electronics Engineering (Bachelor's Degree) — INATEL

- CERTIFICATIONS

 - 2013 — SAP Integration Certification — Softway
 - 2008 — Solution Integrator Experienced Certification (Job Stage 5) — Ericsson

- COURSES & SPECIALIZATIONS

 - 2026 — Claude Code: The Complete Course — Udemy
 - 2026 — GitHub Copilot CLI — GitHub
 - 2025 — AI Automation — Udemy
 - 2025 — MCP Crash Course — Udemy
 - 2025 — Working with Vue 3 and Go — Udemy
 - 2025 — Working with Microservices in Go — Udemy
 - 2025 — GitHub Copilot — Udemy
 - 2023 — Metaverse — Coursera
 - 2019 — Elixir & OTP — The Pragmatic Studio
 - 2018 — Elixir: Scalable and Efficient Application Development — Udemy
 - 2017 — Specialization in Erlang Programming — Kent University / FutureLearn
 - 2016 — Specialization in Ruby on Rails Web Development — Johns Hopkins University / Coursera
 - 2015 — Web Applications Architectures — University of New Mexico / Coursera
 - 2014 — Specialization in Data Science — Johns Hopkins University / Coursera
 - 2010 — Ruby on Rails Advanced — Caelum
 - 2010 — Ruby on Rails — Caelum
